EDUCATION

Tufts University

Boston, MA

B.S in Computer Science; Cumulative GPA: 3.70/4.0

Expected May 2020

Relevant Coursework: Data Structures, Discrete Mathematics, Machine Structure and Assembly Language Programming, Web Programming, Cybersecurity, Algorithms

SKILLS

- **Languages:** C++, C, CSS, HTML, Java, Javascript, LaTeX, Python, Rust
- **Technologies:** Elasticsearch, ExpressJS, Flask, Git, Google Cloud, MongoDB, VueJS

EXPERIENCE

Toast Inc.

Boston, MA

Software Engineering Intern

May 2018 - August 2018

- Improved testability of core Android app authentication service by refactoring some of its original architecture and testing changes using Mockito and JUnit.
- Designed, developed, and presented an upgraded solution for adding new printer receipt languages, interfacing Java web application changes with both the android app and printer hardware.
- Reimplemented an indexing strategy for an internal microservice used to query device metrics from Elasticsearch.
- Streamlined app modularization process by refactoring the workflow of android device monitoring.

Symphony Ventures

Boston, MA

Research Analyst Intern

July 2017 - August 2017

- Analyzed and researched more than 30 internal projects, conducting quantitative analysis on financial metrics regarding Robotic Process Automation projects for companies in the Fortune 500.
- Traveled to UK and Poland offices for two weeks in order to conduct interviews with consultants in order to perform in-depth analysis on past projects.

Tufts University

Medford, MA

Teaching Assistant

January 2017 - Present

- Hold weekly labs and office hours for ~300 students to reinforce concepts taught in Introduction to Computer Science(COMP11) and Data Structures(COMP15).
- Grade homework assignments and exams while providing personal feedback to students to improve their programming skills.

PROJECTS

Chip-8 Emulator · Rust

March 2018 - April 2018

- Implementation of an emulator for the Chip-8 virtual machine.
- Keyboard and graphics built with SDL2

Schnapz · Javascript

November 2017 - December 2017

- Web application that uses two third party APIs to provide a list of recipes that can be made based on food-based images that are uploaded to the application.

Arith · C

October 2017

- Command-line based program that implements a lossy compression algorithm to decrease the size of images.
- Compressing and decompressing the same image results in 97 – 99% data retention.

Speechy · Python

August 2017

- Terminal-based program that uses Google's Speech API and one other third party API to transcribe audio files and punctuate the transcription with approximately 90% accuracy.

EXTRACURRICULARS

Tufts TURBO

Medford, MA

President

September 2017 - Present

- Plan and host annual breakdancing competition (Turbomania) for over 300 dancers from the Greater Boston Area.
